

OffenderWatch Express Check-In cuts processing time of re-registration and address updates to a fraction of what it is today by allowing offenders to pre-enter certain data before appearing in front of an officer.

Key Benefits:

- **Save time.** Offenders save time by updating information, receiving reminders of next verification/re-registration date, and printing a receipt to bring to the registering agency. Officers save time entering and editing offender records.
- **Receive proactive alerts.** Officers receive messages when an offender has made an update to his/her file.
- **Access secure database.** Officers can also view a list of all offender registration updates in the file that are pending, completed or expired. Once an offer is satisfied with the data, the file is then applied to the registry database.

OffenderWatch Network Quick Facts:

- The **largest** sex offender registry system in the U.S.
- Statewide implementation in 16 states and counting.
- Founded in 2000 in Covington, La. under the Watch Systems company,
- Includes data on registered sex offenders from sheriffs' offices, police departments, Attorney Generals' offices, U.S. Marshal judicial districts, U.S. attorneys, federal and state probation and parole agents, department of corrections, Indian tribes, and more.
- Partnered with Canada in spring 2018 to enhance the Canadian National Sex Offender Registry

"OffenderWatch has been an instrumental tool in tracking sex offenders in Marshall County. In the past year alone, without the utilization of this technology, our office would not have been able to apprehend several missing sex offenders. Without hesitation, the top notch support provided by the staff of OffenderWatch is to commended." -- **Tina Brown, Sex Offender Compliance Officer, Marshall County Sheriff's Office**
